The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In re claim 1, the "where in at least a part.....A/B is 1.8 or more" is not a part of the semiconductor device structure as claimed and therefore the scope of the claims can not be determined. No patentable weight is given to the absorbance test because it is not a structure limitation of the semiconductor device.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 insofar as understood are rejected under 35 U.S.C. 102(b) as being anticipated by Kunikiyo (US 2002/0047169 A1, cited by Applicants).

Kunikiyo discloses a semiconductor device comprising an insulating film containing silicon, oxygen, and hydrogen. Note paragraphs [166]-[170], [183]-[185], [194]-[222], and [257].
